Subject: RE: Supplemental comments regarding Gunnison Copper Project Class III Draft Underground Injection Control Permit

Dear Ms. Rumrill,

I have already submitted a lengthy protest to the proposal of the in-situ mining proposal in Arizona.

This is an absurd suggestion. How many 'wetlands' do you think there are in Arizona? The sandhill cranes are a joy to thousands every year. Not to mention the frogs, other birds, ducks, wildlife, water, etc. They will be dropping over dead, and it will be on the voting members consciousnesses forever. But the animals will not survive. How can one even THINK of approving this incredible rape of the earth? We only have one earth, Arizona NEEDS this wildlife sanctuary. The animals do not deserve to die. You must vote this down, and with passion - JUST SAY 'NO'!

We have enough mines in Arizona. Leave the wetlands alone.

I am also vehemently opposed to the Rosemont Mine. Leave our mountains on the east side of I-19 as they were meant to be. I have personally been there many, many times and encountered deer every time. Pretty little animals I've never seen before in my life. This area is one of my favorite places on earth. I haven't seen in person the Jaguars that have been photographed there, but they migrate through that area.

I know this is a different situation and vote, and I know that you will never read this letter. I hope someone will read it, and feel me and my passion on this subject. If the EPA continues to rape Arizona, I might just move back to Atlanta.

Sincerely, Connie Creed

Ms. Connie Creed
